

Some questions:

1. How to change Visa from student Visa to working Visa?
2. Some channel, websites, or agents that could help fasten the process of finding a job in Japan? (apply directly or via head hunting agent?)
3. About interviewing process in IT company in JP? How many testing round/interviews it would have? And what each round usually about?
4. About the options of PhD extension: (1) Stay in JP and apply tuition fee exemption (in case tuition fee exemption won't be approved, I have to pay for everything including living expense and tuition fee); (2) Leave of absence from school Soken-dai (student need to pay tuition fee for a next semester in this case); (3) Withdraw from school (then can come back for defense, student don't have to pay for tuition fee)? Which should be a suitable to choose in my case?

I hope we can talk and discuss something about these matters hopefully to get some kindly advices/references from you as a friend ☺
