Tokyo, July 17th 2015

Dear Dr. David koll,

This letter is to serve as my formal recommendation of Phan Xuan Thien for his application to your CleanSky ITN Summer School 2015.

I have known him since 2014 when he did his master internship under the supervision of my colleague in the National Institute of Informatics. Because of his success in the internship program and his outstanding academic performance, he successfully applied for the Doctor program and the MEXT scholarship to pursue his Doctoral study. He is currently a Doctoral student in SOKENDAI and working under my supervision. The topic is developing solution for early-stage anomaly detection on large-scale networks.

As a young Doctoral student, learning new knowledge and experience regarding his research fields is important for him to pursue his Doctor study and develop his professional research career. Therefore, your summer school will be definitely beneficial for him. If he has a chance to participate your program, he will be successful.

For all of his achievements and the benefits of your program for his research career, I recommend Phan Xuan Thien in most enthusiastically. Any assistance you could render to his application for admission would be highly appreciated. If you would like to discuss this further, please feel free to contact me.

Sincerely,

Kensuke Fukuda
