**Invitation Letter for Mr. Phan Xuan Thien's visit to Göttingen, Germany, in
September 2015 (including attendance to EU CleanSky Summer School, September
14-18)**

Dear Mr. Thien,

As the Coordinator of EU FP7 project CleanSky and general chair of the 1st CleanSky Summer School 2015, it is my pleasure to inform you that you've been successfully selected to attend the 1st CleanSky Summer School, September 14-18, 2015 in Göttingen.

CleanSky (Network for Cloud Computing Eco-System) is an EU 7th Framework (FP7) sponsored project which aims to develop innovative approaches in the emerging areas within the eco-system of cloud computing: data center evolution, consolidation and service migration, and beyond, via structural training of young researchers.

I believe you will be able to obtain a visa successfully to visit Germany for the summer school. We would further like to invite you to present your research on "Early-stage anomaly detection and mitigation in large-scale networks" in the weeks before or after the summer school (any time between September 1 and 28). We look forward to meeting you in Göttingen soon.

Sincerely,

Univ.-Prof. Dr. Xiaoming Fu, Coordinator of EU FP7 CleanSky project
Chair for Computer Networks
Institute of Computer Science
Georg-August-Universität Göttingen
Germany
